

CURRENT SWITCH: VHS Video

How to Reduce or Eliminate Electromagnetic Pollution in the Home & Office by John & Trish Banta

The only of its kind! A very practical and easy to watch video guide to detecting and minimizing unwanted man-made EMFs. Includes step-by-step information on how to deal with electric blankets, water beds, computers, microwave transmitters, radar, and household wiring! Must watch for home buyers, electric sensitivities, and anyone concerned about EMFs. 1994

Current Switch Video (Cat. #A610).....\$29.95 Be sure to get 2nd edition

WARNING: THE ELECTRICITY AROUND YOU MAY BE HAZARDOUS TO YOUR HEALTH

by Ellen Sugarman

Originally published in 1992 and out of print for several years, this investigative journalist has revised, improved, and expanded her original work and made it available once again. Clearly written for the non-technical reader but absolutely right on with useful and practical information for understanding, detecting, and reducing EMFs. Topics include: EMF controversy explained, how to do an EMF survey, what do the studies prove? managing EMFs at work, and current EMF litigation. Comprehensive and relevant. Highly recommended. 1997.

Warning: The Electricity Around You ... (Cat. #A525) \$17.00 Be sure to get the last edition (97)

ELECTROMAGNETIC FIELDS

A Consumer's Guide to the Issues and How to Protect Ourselves
by B. Blake Levitt

A frank, balanced, informative book explaining where electromagnetic fields are in nature, what illnesses may have a connection to EMFs, why doctors' knowledge may be limited, how the safety of homes and offices can be determined, and what action citizens and communities can take toward protection. 400 pages. 1995 Regular price: \$15.00

Electromagnetic Fields (Cat. #A580)....\$16.00

SILENCING THE FIELDS

A Practical Guide to Reducing AC Magnetic Fields

by Ed Leeper

Ed Leeper (who worked with Wirtheimer in the 1970's on the ground breaking study linking EMFs with childhood cancer) has finally published his considerable thoughts and experience dealing with electromagnetic fields. He covers in depth the concepts of net current, fields from water lines, improper electrical wiring practices and how to correct them. Then he goes on to selecting an EMF meter, principles of practical magnetic shielding, considerations for fluorescent lighting, small appliances, radiant heating etc., etc. Written in a candid language with ample illustrations. Clear enough for the patient layperson, and specific enough for the electrician, engineer or physicist. This is the PRACTICAL solutions book we have all been looking for. 340 pages, 2001

Silencing The Fields (Cat. #A547) \$49.50

TRACING EMFs in Building Wiring and Grounding

by Karl Riley

A practical guide for reducing AC magnetic fields produced by building wiring and improper grounding practices. Step by step instructions for detecting wiring problems and a full description of common wiring errors and how to correct them. This guide is for anyone who wants to inspect their own home, electricians and electrical inspectors, those starting a new profession in EMF consulting, as well as those involved with the process of building construction such as architects and contractors. Utility personnel involved in EMF measurements can profit from this information. 71 pages, soft cover book. 1995

TRACING EMFs (Cat. #A530).....\$27.50

TRACING MAGNETIC FIELDS IN BUILDING WIRING Video

by Karl Riley

This video graphically explains how certain wiring errors create high magnetic fields. It shows step-by-step methods of measuring the fields and then how to find the faulty circuit and the wiring error. Created under a grant from California Health Services to help school electricians reduce the magnetic fields found in the state's schools during a 90-school magnetic field survey. Filmed by the video dept. of Southern California Edison and using their graphics animation to show how the currents move in misconnected circuits. Written and hosted by Karl Riley, author of Tracing EMFs in Building Wiring and Grounding. VHS 23 minutes.

Tracing Magnetic Fields... Video (Cat. #A531) \$19.95
